

## Submitting updates for Guardium system requirements / platforms supported documents

1. Open the document that requires an update:

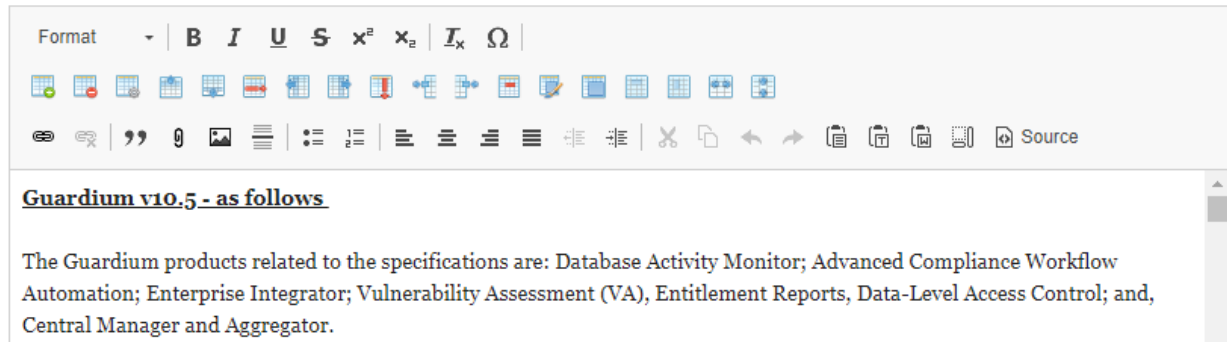

- System requirements / platforms supported for Guardium V10.6  
<https://www-prd-trops.events.ibm.com/node/system-requirements-platforms-supported-ibm-guardium-v106>
- System requirements / platforms supported for Guardium V9.5  
<https://www-prd-trops.events.ibm.com/node/system-requirements-ibm-guardium-v95>

If you see an “Access Denied” message, you need to log in: click the  icon and authenticate using your IBM intranet credentials.

2. Select the  tab to begin working with the document content.

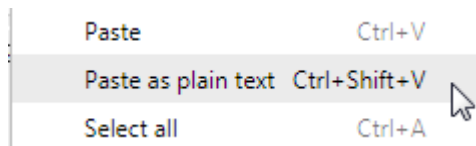

3. Use the “Content” field to make any required updates:

**Content**

Tips:

- To paste text without formatting, Ctrl-Right Click and select “Paste as plain text” from the context menu:

- Insert table rows using the “Insert row before”  and “insert row after”  buttons.

4. Use the “Internal Use Only” field to log your update. Provide the following information:

- The date
- Your name
- A summary of the update
- Edit requested by (name of source)

Example:

- 2018-08-16 Matt Novak Removed version 2012 from Microsoft MS-SQL Server
- 2018-06-16 Anu Baskar Added Cloudera version 5.8

5. Set the “Publisher” field to “Anupama Baskar-Anu.Baskar@ibm.com”:

**Publisher**

Anupama Baskar-Anu.Baskar@ibm.com ▼

6. Use the “Change to” field to set the document state to “Waiting Publish Approval”:

**Current state:** Draft

**Change to:** Waiting Publish Approval ▼

7. Click the  button to save your changes and submit the document for final review and publication.
