Secure interactions and

data protection Rest easy knowing that all your

diagnostic data is protected throughout the problem resolution process.

Expertise, efficiency, and customization

IBM combines expansive subject matter expertise, automation and AI, and customized offerings to provide a support experience that can handle any problem, no matter how big or how small.

Expertise, efficiency, and customization

IBM Support engineers are industry experts with a depth of expertise and a breadth of knowledge across products, platforms, and solutions.

Efficiency

Speed is key, and in critical application environments there is no room for error or delay.

IBM support augments its expertise with a variety of AIdriven tools, powered by watsonx, to facilitate data analysis and expedite problem resolution.

Customization

Not every workload is the same—some deployments can operate with the risk of downtime, while others cannot.

IBM support provides a variety of support tiers to meet the needs of your environments.

- Base Support
- Advanced
- Premium
- Extended
- Sustained

Availability to meet all your needs

Around-the-clock availability

Our expert teams are positioned around the globe, ensuring that we are available to meet your needs at the time that works for you—for all your concerns; critical or minor. For severity 1 problems, this availability includes weekends.

Strong knowledge base and self-service options

IBM maintains a vast repository of knowledge articles, forums, and documentation for self-service troubleshooting.

The IBM Support Community and tools like Fix Central allow you to find solutions quickly, often without opening a support case.

Proactive approach

We are committed to working with you proactively for your upcoming events such as upgrades, helping you to avoid problems before they occur.

We take pride in partnering with you to assist you in adopting and deploying IBM solutions.

Secure interactions and data protection

IBM support teams are trained on the importance of securing and sensitively handling all diagnostic data required to resolve your support issue. IBM Support data handling meets all **HIPAA** requirements

For the most critically sensitive data, a secure diagnostic environment is available to provide heightened protections

IBM Support adheres to all **GDPR and DORA standards** for all customers, not just those in the EU

Industry-leading customer satisfaction (OSAT)

OSAT (Overall Satisfaction) is an industry-wide standard of rating customer satisfaction, measured on a scale of 1 to 5, that assesses your satisfaction with a support interaction based on:

- The support engineer's knowledge and communication skills
- The resolution that was provided to your problem
- How quickly you received the resolution

IBM has the highest OSAT (90+*) in the software support industry, with most of our feedback centering on:

- The efficiency and speed with which IBM Support provides resolutions
- The technical expertise of our support engineers
- Our dedication to our clients' success

IBM Support

Client Feedback:

- Around-the-clock support: Once you got on the phone with us, you never left us or handed us off even though we worked around the clock until the environment was restored.
- **Speed:** Special thanks to the IBM team, whose actions were an incredible example of a multi-role team presenting itself as a unified IBM to assist a customer in dire need; and they did it at a moment's notice.
- **Communication:** We appreciated level of communication and the understanding you have on the issue and level of research you do at the backend, which is truly appreciated.
- Knowledge sharing: Thank you for such a comprehensive training session in a single day. Your thoughtful approach and practical examples helped our team to grasp complex technical concepts with ease!
- **Dedication:** IBM demonstrated a high sense of responsibility and commitment in assisting us with our maintenance operations.
